

ENROLLMENT DATA POLICY

A district/institution will be ineligible for next year's federal funding if the federal accountability data - both enrollment and follow-up data, is not entered completely and accurately into the Local Consolidated Annual Performance (LCAP) report website database, by the due date.

Two clarifications:

1. Consortiums - That portion of funding that is withheld from a district/institution will be placed back into the general grant for statewide redistribution.
2. Reinstatement of Eligibility - In subsequent years, a district/institution will be eligible if the baseline data (enrollment and follow-up) from the previous year plus the current year's information is entered into the system.

In effect, if a school does not submit the data by November 4, 2005, then they would not be eligible for Perkins Funds for the 2006-2007 school year.
